BENEFITS: BEST MINI PHOS 8-30-15 with AVAIL

- AVAIL[®], a non-plant food ingredient designed for coating on granular phosphate fertilizers, sequesters antagonistic metals in the soil surrounding the fertilizer granules, reduces tie-up of phosphate and makes phosphate more available to the plant.
- AVAIL[®] is water soluble and biodegradable.
- Undisturbed, AVAIL[®] continues to inhibit phosphate fixation throughout the growing season.
- A high quality mini-size (SGN 150) homogeneous N-P-K fertilizer.
- Contains a 1:4:2 ratio of N:P₂O₅:K₂O to provide high levels of phosphate to aid root growth in new plantings.
- Mini-sized for better particle distribution (more pellets per square foot).
- Potash from sulfate of potash.

APPLICATION RATES:

Application rates may be decreased 20 to 50 percent for phosphate fertilizers treated with AVAIL[®]. Follow the recommendation of a qualified individual or institution, such as, but not limited to, an agronomist or a Simplot representative before reducing the application rate.
