

You'll WIN with Jackpot

JACKPOT

Don't gamble with a less rounded variety when you can WIN with JACKPOT.

- ✓ Great spring green up
- ✓ Good against rust and powdery mildew
- ✓ Excellent seeding vigor
- ✓ Quick to germinate and establish

Jackpot Kentucky bluegrass (*Poa pratensis*) competes with BMVG and Mid-Atlantic type varieties but it is newer and shows better turf qualities.

Jackpot is a cost saving variety with pleasing medium-fine leafed, medium-green color and with superior seedling vigor. Jackpot jumps off to a quicker start than many Kentucky bluegrasses with its faster germination and establishment.

Jackpot also exhibits **excellent** wear ability under traffic stress.

Jackpot has GREAT spring green up, EXCELLENT spring and fall performance and GREAT cold tolerance.

Jackpot was bred for tolerance against many strains of rust and powdery mildew. It performs on heavy soils with moderate fertility but does not like acidic soils.

Jackpot is a good fit to blend with elite Jacklin 5-Steps Above™ varieties for sod and landscape. Ask your Jacklin representative how you can win using Jackpot in your blends and mixtures.

Seeding Rate: 2-3 lbs./1000 ft² (10-15 g/m²) by itself or blended with other bluegrasses. Mix Jackpot with 20% ryegrass or 80% tall fescue.
