

Jacklin's All Time Top Selling Blue

5★ = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

- ✓ Trusted the world over for premium performance and superior turf consistency
- ✓ Proven "top-10" turf quality in US and Canadian University trials for 15 years running
- ✓ Ushered in the era of the "low-mow" Kentucky blues

- | | | | |
|-------|-----------------|-------|------------------|
| ★★★★★ | Close Mowing | ★★★★★ | Summer Patch |
| ★★★★ | Shade Tolerance | ★★★★ | Dollar Spot |
| ★★★★★ | Low Fertility | ★★★ | Leaf Rust |
| ★★★★★ | Heat Tolerance | ★★★★★ | Leaf Spot |
| ★★★★★ | Turf Density | ★★★★★ | <i>Poa annua</i> |

Award is the ideal fairway bluegrass, able to perform at close mowing down to 0.5" (12 mm) and top rated at mowing heights below 1" (25 mm). Or, bring that golf course look to your lawn, park, or sports field with **Award's** luxurious dark green color and ground-filling density that helps crowd out weeds.

Fairway mixtures with Award and other Jacklin bluegrass

Broad Adaptation: **Award** does well from alpine climates to the sizzling Transition Zone. It is the first elite bluegrass to excel at all maintenance levels, scoring high in trials for unirrigated, low maintenance lawns while also scoring in the top for close-mow tolerance, summer density, fall color, and turf quality in the Northeast region.

Trusted Worldwide: Having been planted on over 100,000 acres of turf in over 20 countries, you can have confidence that **Award** will perform for you. According to unbiased test results, **Award** is top rated in spring density and ground cover, late fall (December) color and ground coverage, traffic and wear tolerance, Transition Zone endurance, shade tolerance, fewest seedheads in the turf, and fastest sod lifting (stretch resistance).

Pest Resistant: **Award** scores high marks in pink snow mold, summer patch, necrotic ring spot, leaf rust, and anthracnose resistance and is one of Jacklin Seed's best against dollar spot. Its dense nature fights encroachment of *Poa annua*.

Seeding Rate: 2-3 lbs./1000 ft² (10-15 g/m²) by itself or blended with other bluegrasses. Mix **Award** with 20% ryegrass or 80% tall fescue.
