

# AWESOME

## Kentucky Bluegrass

### FEATURES

**AWESOME** Kentucky bluegrass (*Poa pratensis*) is particularly well-suited for adding to cool-season turf mixtures or bluegrass blends.

- Top rated in the Northeast Transitional Zone MIDWEST GREAT PLAINS. In these 4 regions in the 2001 NTEP National Trials, there is no statistical difference between **AWESOME** (J-1420) and the top rated variety.
- **AWESOME** (J-1420), a new “Aggressive Type” Kentucky Bluegrass has the BEST Turf Density score of all the bluegrasses during Spring and Summer in the 2001 NTEP trials and has no statistical difference from the TOP Density score during Fall and Winter!

### PERFORMANCE CHARACTERISTICS

The increased density of **AWESOME** Kentucky bluegrass as demonstrated in the 2001 NTEP helps crowd out weeds and *poa annua*. **AWESOME**'s fine leaf texture is similar to Midnight and Rugby II making it an **awesome** choice to blend with other Kentucky bluegrasses to increase the density of your turf stand.

**AWESOME**'s dark green color is compatible in a mix with other cool-season turfgrasses and it has a lower growth habit.

### SUPERIOR DISEASE TOLERANCE

Disease resistance is excellent and in 3 of the 4 Maintenance Schedules in the 2001 NTEP trials, there is no statistical difference between **AWESOME** Kentucky Bluegrass and the top rated variety.

### SUGGESTED SEEDING RATE

2-3 lbs. per 1000 ft<sup>2</sup> (10-15 g/m<sup>2</sup>)
