

BLUE GENES

Kentucky Bluegrass Blend

SPECIAL FEATURES

- Excellent spring, summer, fall density and color
- Broad based disease resistances
- Broad geographic adaptation where high fertility and supplemental irrigation are available
- Tolerant of low mowing heights

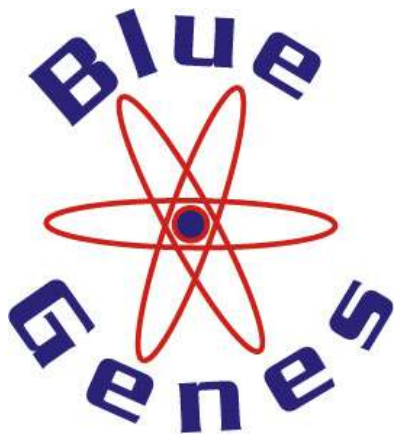

FORMULA

3-way Kentucky bluegrass blend selected from the following varieties:

Award, NuDestiny, NuGlade, Everest, EverGlade

AGRONOMIC CHARACTERISTICS

Blue Genes blend was developed for its turf quality over a broad range of environmental conditions. The varieties complement each other in turfgrass situations. All cultivars have been selected for a high level of disease resistance and each has exhibited good resistance to necrotic ringspot, snow mold and leaf spot diseases. Specific qualities:

- Attractive dark green color
- Excellent wear tolerance and recuperative qualities
- Versatility of mowing heights
- Moderate to High management adaptation
- Excellent performance on golf tees and fairways
- Performs well on highly maintained athletic fields
- Well suited for overseeding purposes

SUGGESTED SEEDING RATE

50 - 150 lbs./acre
