

# CADDIESHACK

## Perennial Ryegrass

### STRENGTHS

- Truly elite turf performance
- Resistant to many troublesome diseases
- A beautiful dark green color
- Northern and Southern adaptation

### AGRONOMIC CHARACTERISTICS

**ATTRACTIVE APPEARANCE:** Caddieshack is a medium-fine textured variety with high density and a beautiful dark green color.

**SUPERIOR DISEASE RESISTANCE:** In the final stages of development we concentrated on increasing Caddieshack's resistance to leaf spot disease. In National Tests, Caddieshack demonstrated improved resistance to leaf spot, pink snow mold, and dollar spot diseases.

**REDUCED WINTER INJURY:** Caddieshack exhibits reduced winter injury and maintains excellent living ground cover year-round.

**PROVEN PERFORMANCE:** Caddieshack has consistently been an elite "page one" performer since it was first entered into National Testing.

### INSECT & DISEASE TOLERANCE

Caddieshack is enhanced with *Neotyphodium* endophyte to provide excellent resistance to several common turfgrass surface-feeding insects, including:

Sod webworm	<i>Crambus spp.</i>	Weevil	<i>Hyperodes and Listronotus spp.</i>
Chinchbug	<i>Blissus spp.</i>	Aphid	<i>Aphis spp.</i>
Billbug	<i>Sphenophorus parvulus</i>	Fall armyworm	<i>Spodoptera frugiperda</i>

Leaf spot	Excellent resistance	Pythium blight	Good resistance
Dollar spot	Excellent resistance	Pink snow mold	Good resistance
Red thread	Very good resistance	Leaf rust	Good resistance
<i>Rhizoctonia</i> brown patch	Good resistance		

### SUGGESTED SEEDING RATES

Permanent turf establishment:

4-7 lbs./1,000 sq.ft., Interseeding: 2-5 lbs./1000 sq.ft.

Dormant bermudagrass overseeding:

Greens: 25-40 lbs./1000 sq. ft., Fairways: 200-500 lbs. /acre.
