

GRID IRON

Mixture

SPECIAL FEATURES

- Excellent heat and drought tolerance from a deep root system.
- Superior wear tolerance and recuperative potential.
- Improved sod-forming characteristics.
- Excellent density and leaf texture.
- Good adaptation to sun or shade.
- Adapts well to a low maintenance program.
- Superior resistance to brown patch, *Pythium*, and net blotch diseases.

FORMULA

- 80% 2 of 3 Tall Fescue**
Selected from Quest, Inferno, Arid 3 and/or Pixie
- 10% Kentucky Bluegrass**
Selected from NuBlue, BlueChip or Liberator Kentucky bluegrass
- 10% Perennial Ryegrass**
Selected from Caddieshack or GoalKeeper Perennial Ryegrass

AGRONOMIC CHARACTERISTICS

GRID IRON

GRID IRON MIXTURE provides all of the outstanding characteristics of our Triple-A tall fescue blend plus improved sod-forming characteristics and recuperative potential by using Kentucky bluegrasses.

The Kentucky bluegrass varieties will also maintain a denser and finer textured turf by creeping into voids caused by divots or excessive wear. The perennial ryegrass provides quick establishment and soil stabilization.

SUGGESTED SEEDING RATES

New Seeding	275 - 300 lbs./acre
Overseeding	100 - 200 lbs./acre
