Jacklin Seed's Heisman Brand Mixture is the MVP of Seed blends. Our Heisman Mixture is designed for the discriminating turf manager who recognizes the value of seeding or overseeding with a high percentage of Kentucky bluegrass with limited perennial ryegrass. We believe this combination makes for the ideal turf. Research has shown that Heisman’s specific combination of bluegrass and ryegrass produces the optimum blend of tillers in the maturing turf.

FORMULA

85% 3 of these top performing Kentucky bluegrasses: AWARD, LIBERATOR, NuGLADE, TSUNAMI

15% Jacklin perennial ryegrasses such as: TOP GUN II

AGRONOMIC CHARACTERISTICS

The performance and durability of Heisman Mixture will enhance your turf area with:
- Superior Summer disease tolerance
- Long-term durability
- Season-long dark green color
- Excellent wear tolerance

USES

Any elite highly maintained landscaped area such as golf course fairways, athletic fields and lawns. The low percentage of perennial ryegrass in Heisman will provide excellent soil stabilization while establishing a dominant Kentucky bluegrass stand.

SUGGESTED SEEDING RATES

New establishment: 100 to 150 pounds per acre, or 2 to 3 lbs. per 1000 ft².

For overseeding into existing turfs, rates of up to 75-100 lbs. per acre are acceptable.
