

# JAGUAR 3

## Turf Type Tall Fescue

### SPECIAL FEATURES

**Jaguar 3** is the perfect tall fescue for high visibility areas where rich color and high density are required. It thrives in shaded areas and withstands heat, drought, and poor soils. Put these traits together with **Jaguar 3's** excellent resistance to brown patch and *fusarium* patch and you have one unsurpassed tall fescue.

- Dark, rich color
- Excellent overall quality
- Brown patch and *fusarium* patch resistant
- Deep root system
- Drought tolerant
- Good heat tolerance

### PERFORMANCE CHARACTERISTICS

- Since 1993, **Jaguar 3** has been topping the NTEP for spring, summer, and fall density; it performs when you need it most.
- Germinates rapidly in 7-10 days
- Excellent wear tolerance
- Thrives in both sun and shade
- Can be maintained at 1 ½" to 2 ½" mowing height
- Ability to show dwarf characteristics
- #1 choice for sports fields and sod farms mixed with top-performing products like Arid 3, Pixie and Quest.

### ADAPTATION

**Jaguar 3** performs well over a wide range of conditions from full sunlight to shade. With its dark, rich color, exceptional density, and a deep root system, it requires less fertilization and water. **Jaguar 3** is a proven performer from the southern most portions of the transition zone to wherever cool-season grasses are adapted.

### SUGGESTED SEEDING RATES

6-12 lbs. per 1,000 sq. ft. (260-520 lbs. per acre)
