

LIMOUSINE

Kentucky Bluegrass

FEATURES

- Extremely Dense
- Very Fine Leaf Texture
- Low Growing
- Frost Tolerant
- Seedling Vigor
- Quick Germination
- Spring and Fall Ground Cover
- Wear Tolerant

PERFORMANCE CHARACTERISTICS

Limousine Kentucky bluegrass (*Poa pratensis*) has exceptional quality and that has always been tied to its density. **Limousine** has the finest leaf texture, and performs extremely well at mowing heights from 0.5-1.0 inches. It also has shown terrific turf performance at 2.1 to 3 lbs. N, and at mowing heights above an inch. **Limousine** germinates quickly, has exceptional seedling vigor, and has impressive spring and fall ground coverage.

RECOMMENDED USES

Limousine does very well in the cool-humid region. **Limousine** also performs well in shade, and has quality performance in the transition and cool-arid zones. **Limousine** limits weed encroachment (including *poa annua*) due to its density. It also has does well at mowing heights from 1.1 to 1.5 inches.

DISEASE TOLERANCE

Leaf rust	<i>P.poa-nemoralis</i>	Summer patch
Powdery mildew	<i>Erysiphe graminis</i>	Crown rust
Brown patch	<i>Rhizoctonia solani</i>	Leaf spot
Stem rust		Microdochium patch

SEEDING RATE

Permanent turf establishment: 2-3 lbs./1000 sq.ft. (10-15 g/m²)
