

Putter
Creeping bentgrass

Economic Choice for Blends

Southshore
CREEPING BENTGRASS

- Good establishment
- Medium-deep green color with dense, medium-fine leaves
- A solid choice wear tolerance and winter hardiness
- Economical choice to combine with other Jacklin bentgrass varieties such as L-93

Southshore and **Putter** creeping bentgrasses (*Agrostis stolonifera*) provide good establishment and durability making them an economical choice for fairways, tees, greens and divot repair. With remarkable blending capabilities and quick recuperative potential, **Putter** and **Southshore** have proven track records when combined with other bentgrass varieties such as **L-93**.

SOUTHSHORE

Shows the ability to use effluent or water sources that have a salt level of 15,000 ppm with a pH of 7.5-8.5.

PUTTER

Good disease resistance with reduced thatch accumulation and resistance to *Poa annua* invasion

Seeding Rate: New Seeding: 1-2 lbs. per 1000 ft² (5-10 g/m²)
Interseeding: 2-4 lbs. per 1000 ft² (10-20 g/m²)
