

Southshore Creeping Bentgrass

SOUTHSHORE's aggressive establishment and exceptional durability makes it a top choice for fairways, tees, greens and divot repair on elite golf courses throughout the world. It has remarkable blending capabilities and quick recuperative potential. Formerly produced by Lofts Seed (ABT), **SOUTHSHORE** is now exclusively part of the Jacklin Seed product lineup.

Shows the ability to use effluent or water sources that have a salt level to 15,000 ppm with a pH of 7.5-8.5.

Southshore
CREEPING BENTGRASS

FEATURES:

- Aggressive establishment
- Medium-deep green color with dense, medium-fine leaves
- Exceptional wear tolerance
- Excellent winter hardiness

PERFORMANCE CHARACTERISTICS:

IN THE 1993-1997 NTEP PUTTING GREEN TRIALS:

- **SOUTHSHORE** rated #1 for Spring green-up
- Exhibited exceptional resistance to *fusarium* patch and melting-out.
- Rated #1 against *Poa annua* invasion

IN THE 1993-1997 NTEP FAIRWAY OR TEE TRIALS:

- **SOUTHSHORE** tied for #1 in the Wear Tolerance trial
- Rated #2 for Spring and Summer density
- Rated #3 for Fall and Winter density

ADAPTATION:

SOUTHSHORE is an excellent choice for fairways, tees, greens and divot repairs in any region where bentgrasses are adapted. It can be used alone or combined with other improved bentgrass varieties such as **L-93** and **PUTTER**.
