

RELY III™ G

Granular Soil Surfactant

RELY III™ G is a granular soil surfactant formulated to be applied to turfgrass and, once watered-in, will promote consistent water flow into and throughout the root zone. The carrier for Rely III™ G is derived from a pure dihydrate gypsum source (e.g. TruGyp®) and has been carefully processed into granules which readily breakdown upon hydration from overhead irrigation water.

DIRECTIONS FOR USE

FOR PROFESSIONAL USE ONLY.

Apply RELY III™ G monthly at the rates specified on this label to address dry, water-repellent and / or hydrophobic soil conditions. Best results are achieved when RELY III™ G is applied before the onset of water-repellent soil conditions. For turf areas that are already water-repellent, more frequent applications (every 14 days) may be required until turf area recovers. Always irrigate thoroughly after application to allow the granules to dissolve completely and release the soil surfactant from the gypsum carrier.
