

SurfPack® offers a variety of soil surfactants to prevent and treat water repellency that can result in localized dry spots.

Version210318

High Performance Soil Surfactants

 **@SimplotTurf**

SurfPack®

PRODUCTS FEATURE:

- Chemistries designed to prevent and treat localized dry spot
- Promote hydration of hydrophobic soils
- Improved water infiltration and uniformity in the soil
- Spray, granular and injection formulation options
- Hose-end syringing tablets
- Unique protein-surfactant complex chemistry

PerformancePack™

SurfPack®

High Performance Soil Surfactants

Brilliance®

Originally formulated as a 90 Day Soil Surfactant, Brilliance has long been recognized as one of the top performing wetting agent chemistries

CounterAct™ Firm

A high end soil surfactant that promotes improved water infiltration into the soil and soil moisture uniformity to alleviate water repellency and hydrophobicity

CounterAct™ Retain

A high end soil surfactant that promotes improved water retention in the soil and soil moisture uniformity to alleviate water repellency and hydrophobicity

Compel®

A surfactant syringing pellet designed to improve water penetration into the soil and to rehydrate hydrophobic soils

Compel® Plus

A surfactant syringing pellet combined with North Atlantic Sea Kelp (*Ascophyllum nodosum*) designed to improve water penetration into the soil and to promote re-hydration of hydrophobic soils

Forte™

A novel soil surfactant chemistry which contains a patented protein-surfactant complex that rapidly reduces water surface tension and drives rapid water penetration into hydrophobic soils

Rely® III

Rely III is a soil surfactant formulated to establish consistent water flow into and throughout the root zone.

ReWet®

ReWet® is a soil surfactant treatment chemistry formulated to easily and effectively relieve existing water related problems such as localized dry spots

Syringe®

Syringe is an injectable soil surfactant designed to improve irrigation water penetration

Syringe® Ultra

A high efficiency injectable soil surfactant designed to improve irrigation water penetration
