TRIPLE SUPERPHOSPHATE
0-45-0

GUARANTEED ANALYSIS
AVAILABLE PHOSPHATE ($P_2O_5$)..........................................................45.00%
Calcium (Ca)..................................................................................13.50%
Molybdenum (Mo).....................................................................0.001%

Derived from Monocalcium Phosphate and Dicalcium Phosphate.

1. Highly effective in eliminating phosphate deficiencies in all crops, under all soil conditions. It is uniformly sized and blends well with most fertilizers. It is a preferred source of $P_2O_5$ in high analysis bulk blends.

2. Most effective when applied preplant in bands or broadcast incorporated to alfalfa and other legumes. However, it can be applied effectively as a topdressing on established stands anytime during the year that soil and weather conditions permit. For annual crops it is most effective when tilled in prior to planting.

3. This product is a commercial fertilizer used as plant food in agricultural crop production. For specific application rates follow the recommendation of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

*Recommended Preplant Rate
** Higher rates can be applied based on a soil test

ADVANTAGES

1. Its high concentration of $P_2O_5$ in uniform, free-flowing granules assures even applications to the field. It stores exceptionally well.

CAUTION: Application of fertilizer materials containing Molybdenum (Mo) may result in forage crops containing levels of Molybdenum (Mo) that are toxic to ruminant animals.

Warning: This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, requires notification of potential exposure to substances identified by the State of California as causing cancer, birth defects or other reproductive harm.
