NUTRIENT MANAGEMENT ENHANCEMENT

BIOBURST[®] CONCENTRATE

BioBurst[®] Concentrate is an innovative biostimulant, coupled with a micronutrient package, promoting a more robust rooting system, early new seedling emergence, healthier vegetation, and providing plants access to essential nutrition where and when it's most needed. Some of the micronutrients in BioBurst Concentrate are EDTA or HEDTA chelated, helping protect them from reacting with other materials in the soil. BioBurst Concentrate has consistently shown agronomic value and ROI.

BENEFITS

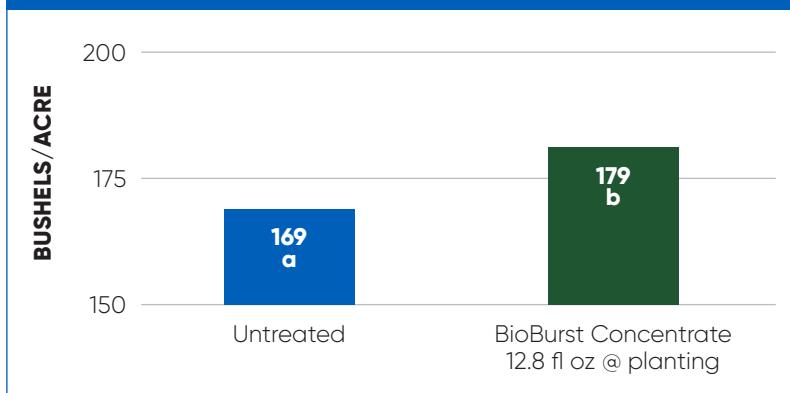

- Biostimulant coupled with an essential micronutrient package
- Promotes root growth and development, early new seedling emergence, and vegetative growth
- EDTA & HEDTA chelated micronutrients help protect nutrients from reacting with other materials in the soil
- Consistent agronomic value and ROI
- Can be applied at plant, in-furrow, 2x2 band, or as a foliar

USE RATES

- **Soil Applied:** 8-16 oz/A
- **Foliar Applied:** 6-12.8 oz/A

CORN YIELD: 2013 – 2018 AVERAGES

Data pooled from 7 trials

2018 CORN RESULTS

13.8 BUSHEL INCREASE
