PLANT NUTRIENT

CHE[™]
COP 7.5%

Copper is an essential micronutrient for crop production that's needed for enzymatic activation, chlorophyll, seed production and more. Protecting and maximizing your copper, the CHE[™] EDTA formulation helps keep copper from reacting with other materials in the soil, maximizing availability and utilization. CHE brands are formulated for soil applications to maximize agronomic ROI.

BENEFITS

- CHE EDTA formulation
- Helps protect copper from reacting with other materials in the soil
- Maximizes availability and utilization of copper
- Soil applied copper

CROP/RATES

Refer to label for the desired rate by crop.
