**CHE**<sup>™</sup>  
**IRON 4.5%**

Iron plays essential roles in chemical reactions within the plant including respiration and photosynthesis and is used by nitrogen fixing bacteria. Protecting and maximizing your iron, the CHE<sup>™</sup> EDTA formulation helps keep iron from reacting with other materials in the soil, maximizing availability and utilization. CHE brands are formulated for soil applications to maximize agronomic ROI.

## **BENEFITS**

- CHE EDTA formulation
- Helps protect iron from reacting with other materials in the soil
- Maximizes availability and utilization of iron
- Soil applied iron

## **CROP/RATES**

Refer to label for the desired rate by crop.
