PLANT NUTRIENT

CHE[™]
MAN 5%

Manganese is an essential micronutrient that's needed for photosynthetic processes, metabolism of nitrogen, lignin synthesis and root growth, and activates some enzymatic systems. Protecting and maximizing your manganese, the CHE[™] EDTA formulation helps keep manganese from reacting with other materials in the soil, maximizing availability and utilization. CHE brands are formulated for soil applications to maximize agronomic ROI.

BENEFITS

- CHE EDTA formulation
- Helps protect manganese from reacting with other materials in the soil
- Maximizes availability and utilization of manganese
- Soil applied manganese

CROP/RATES

Refer to label for the desired rate by crop.
