

PLANT NUTRIENT

CHE PLEX™ COPPER 5% 5-0-0

Copper is an essential micronutrient for crop production that's needed for enzymatic activation, chlorophyll, seed production and more. Protecting and maximizing your copper, the CHE-PLEX™ EDTA & citric chelate formulation helps keep copper from reacting with other materials in the soil, maximizing availability and utilization. CHE-PLEX brands are formulated for soil or foliar applications to maximize agronomic ROI.

BENEFITS

- CHE-PLEX EDTA & citric chelate formulation
- Helps protect copper from reacting with other materials in the soil
- Maximizes availability and utilization of copper
- Soil or foliar applied copper

CROP/RATES
