**PLEX™ ZINC 9%**  
**5-0-0**

Zinc is an essential micronutrient that's part of many enzymes and is important to select metabolic processes. Protecting and maximizing your zinc, the CHE-PLEX™ EDTA & citric chelate formulation helps keep zinc from reacting with other materials in the soil, maximizing availability and utilization. CHE-PLEX brands are formulated for soil or foliar applications to maximize agronomic ROI.

## **BENEFITS**

- CHE-PLEX EDTA & citric chelate formulation
- Helps protect zinc from reacting with other materials in the soil
- Maximizes availability and utilization of zinc
- Soil or foliar applied zinc

## **CROP/RATES**

Refer to label for the desired rate by crop.
