PLANT NUTRIENT

CHE[™]
ZINC 9%

Zinc is an essential micronutrient that's part of many enzymes and is important to select metabolic processes. Protecting and maximizing your zinc, the CHE[™] EDTA formulation helps keep zinc from reacting with other materials in the soil, maximizing availability and utilization. CHE brands are formulated for soil applications to maximize agronomic ROI.

BENEFITS

- CHE EDTA formulation
- Helps protect zinc from reacting with other materials in the soil
- Maximizes availability and utilization of zinc
- Soil applied zinc

CROP/RATES

Refer to label for the desired rate by crop.
