

COMPOSE[®]

0-0-1

Compose[®] is a liquid concentrate that includes humic acids. When applied throughout the year, Compose provides several key benefits that can help improve plant health and aid in increasing crop yields. Compose is a very clean, consistent finished product that is highly compatible with other agricultural products and solutions.

BENEFITS

- Enhances the availability and uptake of nutrients
- Stimulates soil microorganisms
- Buffers salts
- Increases water holding capacity

APPLICATION TIMING

- **Soil**
- **Foliar**

USE RATES

- **Soil Applied: 3-10 gal/A**

Apply a total of 3–10 gallons of COMPOSE per acre. (Applications of 1/2–1 1/2 gallons over multiple applications is preferred). It may be applied by water run, side-dress, mixed with soil-applied liquid nutrients, or sprayed directly on the soil. When sprayed or side-dress without mixing with other nutrients, COMPOSE should be diluted in 3 to 10 gallons of water.

- **Foliar Applied: 1-2 gal/A**

Multiple crop use
