

Compose® SE is a premium, balanced blend of humic acid, fulvic acid, fresh water carbon, and cold water seaweed built to enhance the availability and uptake of nutrients, stimulate soil microorganisms, buffers salts, and minimize plant stress. It also stimulates plant growth and development and helps mitigate stresses.

BENEFITS

- Enhances the availability and uptake of nutrients
- Stimulates soil microorganisms
- Buffers salts
- Increases water holding capacity
- Seaweed component can help mitigate stresses

APPLICATION TIMING

- **Soil**
- **Foliar**

USE RATES

- **8-16 oz/A**

Multiple crop use
