PLANT NUTRIENT

DIVERSE K
0-0-23[®]

Diverse K[®] is an at plant, in-furrow, seed safe potassium and sulfur based fertilizer that can be tank mixed with ortho or polyphosphate products.

BENEFITS

- Excellent at plant, in-furrow potassium and sulfur source
- Seed safe
- One of the safest materials tested in germination trials
- Can be tank mixed with ortho or polyphosphate products

TANK MIXES

Mixes with poly and ortho phosphate fertilizers. When mixing with UAN always add 1 gallon of water for every 1 gallon of Diverse K used. Always jar test applications to determine compatibility

CROP/ RATES

Corn	1-8 gal/A
Soybeans	1-5 gal/A
Wheat	1-3 gal/ A
Trees	Refer to Label
Vines	Refer to Label
Vegetables	Refer to Label
Grapes	Refer to Label
Strawberries	Refer to Label
Blueberries	Refer to Label
Caneberries	Refer to Label

TIMING

- In-Furrow
- Sidedress
- Foliar
- 2x2
- Fertigation
- Sprinkler/Center Pivot
- Micro-Sprinkler
- Drip Irrigation
