## NUTRIENT MANAGEMENT ENHANCEMENT

# ECLIPSE-D™ 30

18-0-0

Eclipse-D™ 30 is a liquid formulation of DCD that helps stabilize the nitrogen molecule in the soil, helping protect the nitrogen from gassing off in the atmosphere (denitrification) and moving downward through the soil profile (leaching). Eclipse-D 30 was designed to help protect nitrogen from denitrification and leaching, but also to increase nutrient use efficiency and maximize agronomic ROI.

## BENEFITS

- Helps protect nitrogen from denitrification and leaching
- Increases nutrient use efficiency
- Helps minimize amount of total nitrogen in ground waters and helps reduce contaminants
- Stabilizes nitrogen for up to 10 weeks

CONTROL

ECLIPSE-D 30

## APPLICATION TIMING

### Application Timing

Can be applied anytime with Urea and UAN.

## USE RATES

**UAN:** 26 oz/ A or 2-4 qts/ton

**UREA:** 26 oz/ A or 2-4 qts/ton

**NH3:** 26-32 oz/ A

Multiple crop use

Please reach out to your local Invictis rep for specific crops and application rates.
