

FORMATION™

828
.43-.08-.84

Formation™ 828 is an innovative Innvictis BioScience soil applied liquid fertilizer coupled with a biostimulant designed to supply essential nutrition, stimulate root development, more fibrous root hairs, root density, and root length, improving nutrient and soil moisture utilization, while helping mitigate stress and maximize agronomic ROI.

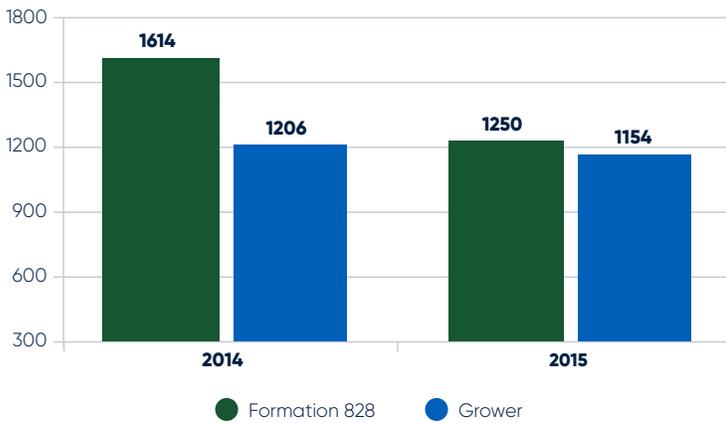

BENEFITS

- Essential early and in-season nutrition
- Promotes germination, enhances root development, more fibrous root hairs, root density, and root length
- Stimulates plant defenses against some biotic and abiotic stresses
- Improves nutrient and soil moisture utilization

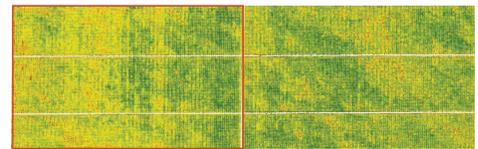

CROP/RATES

Always refer to the product label for Precautionary Language, Directions For Use and Specific Use Rates | Please reach out to your local Innvictis rep with additional product questions

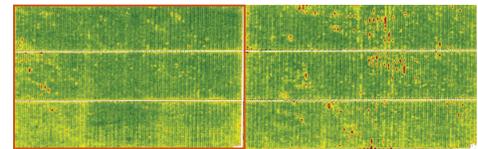

Sugar One – Boxes/Acre

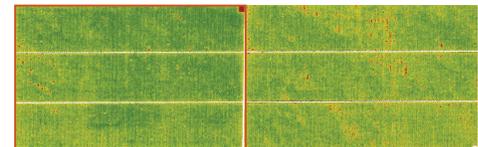

Grape Trial Had 8 Replications

First-year results: Formation™ 828 had a 117 lb/ac increase Nonpareil and a 90 lb/ac decrease Monterey compared to grower's program.

Second-year results: Formation™ 828 had a 314 lb/ac increase Nonpareil and a 322 lb/ac increase Monterey compared to grower's program.

Third-year results: Formation™ 828 had a 235 lb/ac increase Nonpareil and a 400 lb/ac increase Monterey compared to grower's program.

These data are the results of a designed three-year study where the only difference between the treatments was the addition of Formation™ 828 on top of the grower's soil nutrition program. Each block was 125 acres. The yield information was obtained by grower following harvest of each individual block.
