

GOLDEN BIO[®]

Golden Bio[®] is a plant active carboxylic acid designed to enhance nutrient uptake and efficiency. When combined with liquid phosphate fertilizers, Golden Bio's clean formulation biologically stimulates root growth, plants, and soil microbes to enhance overall soil and plant condition, ultimately providing higher yields.

BENEFITS

- Improves soil applied phosphate and micronutrient starter fertilizers and foliar applied nutritional fertilizer uptake
- Golden color, not black, so it doesn't stain equipment and is easy to handle with starter fertilizer equipment
- Helps complex key nutrients keeping them plant available in the soil
- Improved plant uptake of foliar nutrients applied with Golden Bio

CROP/RATES

Soil Applied Fertilizer Efficiency Additive

- Apply 0.5 – 2 gallons/A with liquid fertilizer applications

Nitrogen	Use 1 gallon of Golden Bio to 20 gallons of N/A
Phosphorous	Use 1 gallon of Golden Bio to 10 gallons P /A
Potassium	Use 1 gallon of Golden Bio to 15 gallons of K /A

Foliar Efficiency Additive

- Apply 0.5 – 1 gallon/A mixed with foliar nutrition products

GOLDEN BIO[®]
 @ 1 qt / A
