

PLANT NUTRIENT

# INNICTIS MICROMIX™

Innvictis Micromix™ is a liquid micronutrient formulation containing EDTA chelated Cu, Fe, Mn and Zn. It also contains essential micronutrients B and Mo. The EDTA chelate is designed to help keep the Cu, Fe, Mn and Zn from reacting with other materials in the soil. Innvictis Micromix provides maximum availability of micronutrients when tank-mixed with NPK liquid fertilizers to maximize plant uptake, growth, and development. It will tank mix with all poly and 100% orthophosphate fertilizers.

## BENEFITS

- EDTA chelated Cu, Fe, Mn and Zn; also contains essential B & Mo
- EDTA chelate helps keep Cu, Fe, Mn and Zn from reacting with other materials in the soil
- Designed to help meet plants micronutrient needs
- Mixes with all 100% orthophosphate and polyphosphates fertilizers

## APPLICATION TIMING

In-Furrow, 2X2, Side Dress, Fertigation systems, and Foliar (Ground or Aerial)

## TANK MIXES

- Most commonly used pesticides and fertilizers. Always perform a jar test for compatibility
- Compatible with most glyphosate formulations

## USE RATES

**IN-FURROW/BANDED/2X2:** 1-4 pt/A

**FOLIAR:** 1-2 pt/A.

Can be tank-mixed with glyphosate for foliar applications.

Multiple crop use

Please refer to soil test

## GUARANTEED ANALYSIS

- 0.1% B
- 0.2% Cu
- 0.5% Fe
- 2.0% Mn
- 0.0005% Mo
- 2.0% Zn
