

PLANT NUTRIENT

KayRx[®] is a crop safe, potassium acetate based foliar, with excellent foliar uptake for optimal K utilization. KayRx is backed by VaRx Technology - a proprietary amino acid package formulated to help mitigate stresses crops might encounter during the growing season, and it helps with nutrient absorption through the leaves and roots.

BENEFITS

- Crop safe, potassium acetate foliar with excellent K uptake and utilization
- VaRx Technology - helps mitigate stress and nutrient absorption

APPLICATION TIMING

- Foliar
- Utilize tissue samples for best results

USE RATES

2-4 qts/ A

Multiple Crop Use: Please reach out to your local Innvictis representative for specific crop and application rates
