

PLANT NUTRIENT

Novus® K is an innovative, superior, crop safe and patented triazone, slow release nitrogen and potassium fertilizer. Because of its unique formulation, the nitrogen and potassium are rapidly absorbed, translocated, and remobilized and can be utilized, maximizing agronomic ROI.

BENEFITS

- Innovative, superior, crop safe nitrogen and potassium foliar fertilizer
- Patented triazone slow release nitrogen
- Rapidly absorbed by plant, translocated, and remobilized within the plant for greater utilization
- Unique formulation that minimizes nitrogen loss

CROP/RATES

- 1 - 2 gal/ A
- Designed specially for corn, cotton, soybeans and wheat

APPLICATION TIMING

- Mid to late season in developing crops
- Utilize tissue samples for best results
