

NUTRIENT MANAGEMENT ENHANCEMENT

PYRAMID

Pyramid is a unique blend of essential nutrition and fermentation metabolites or bioactive compounds. The essential nutrition in Pyramid helps provide energy needed to bolster and drive a plants metabolic processes. Pyramid promotes root and shoot growth and development, helping crops have greater access to soil or foliar applied nutrition and soil moistures.

BENEFITS

- Essential nutrition and fermentation metabolites or bioactive compounds
- Helps provide essential energy needed for metabolic processes
- Promotes root and shoot growth and development – greater utilization of essential nutrition and needed moisture

APPLICATION TIMING

- Foliar
- Refer to label recommendation base on crop

USE RATES

10 oz/A

Multiple crop use
