

TRIVICTIN™

Trivictin™ is a proprietary formulation and blend of NBPT, DCD, a polymer, and organic acids. Trivictin was designed to help protect nitrogen investments above ground from volatilization, below ground from denitrification and leaching, and to help maximize NUE and agronomic ROI.

BENEFITS

- **Proprietary formulation**
 - ▶ NBPT
 - ▶ DCD
 - ▶ Polymer
 - ▶ Organic acids
- **Helps protect nitrogen from**
 - ▶ Volatilization
 - ▶ Denitrification
 - ▶ Leaching
- **Helps increase nitrogen mineralization**
- **Increases nutrient use efficiency**
- **Ease of use**
 - ▶ Handling
 - ▶ Impregnation on urea
 - ▶ Blending with UAN

USE RATES

Urea: 1.5-2.5 qt/ton
UAN: 1.5-2.5 qt/ton
