ORGANIC ADVANCEMENTS

ORGANIC ADVANCEMENTS

TURN

Turn is a liquid, fermentation, biological based approach and solution to improving soil health. Turn helps improve water infiltration and the soils aggregate stability, promoting a healthier rhizosphere and rooting system, aiding in nutrient cycling, nutrient solubility and availability, improving organic matter over the long term and overall soil functionality.

BENEFITS

- Fermentation based, biological solution
- Helps improve water infiltration and soil stability
- Promotes a healthier rhizosphere, rooting system, and aids in nutrient cycling, nutrient solubility, and availability
- Helps improve organic matter and overall soil functionality

USE RATES

- **10-32 oz/A**
Multiple crop use

APPLICATION TIMING

- In-furrow
- Broadcast
- Transplant drench
- Drip irrigation
- Refer to label recommendation base on crop
