

VIADUCT™

Magnesium 4%
0.16-0-0

Viaduct™ Magnesium 4% is an innovative Innictis BioScience® foliar secondary nutrient, complexed with amino acids. Because of its unique nature, Viaduct Magnesium is rapidly absorbed by the plant, satisfying nutrient need, demand, and utilization.

Magnesium is the central element in chlorophyll, which is essential for photosynthesis and energy production. It also activates various enzymes involved in plant metabolism, including those responsible for energy transfer, carbohydrate metabolism, and protein synthesis.

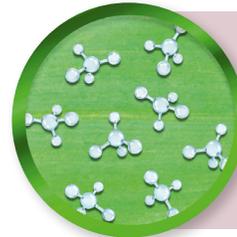

BENEFITS

- Magnesium complexed with amino acids
- Rapid nutrient absorption and uptake
- Aids in the movement of nutrients and helps increase nutrient utilization
- Low risk of phytotoxicity
- Organic chelating agent
- Biodegradable

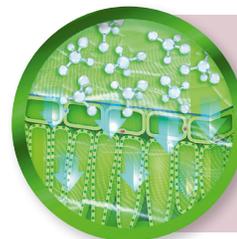

USE RATES

APPLICATION	RATE
Foliar	1 - 4 pt/A
Soil	1 qt - 1 gal/A

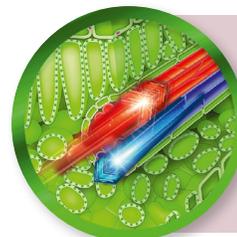

HOW IT WORKS

Secondary nutrients and micronutrients formulated or complexed with amino acids

Rapid absorption and uptake of secondary nutrients and micronutrients

Once the secondary nutrient or micronutrient is inside the plant, its quickly transported inside the cells and the plant cell enzymes are able to break it down, satisfying nutrient need, demand, and utilization.
