

PLANT NUTRIENT

VIRIDIAN™

Viridian™ is an Innvictis BioScience fertilizer. Each dry prill of fertilizer provides a uniform blended analysis of S, Fe, Mn, and Zn, getting better dispersion and distribution of each nutrient across the entire acre. Viridian's advanced coating minimizes dust and granule clumping. Its micronized particles readily dissolve, helping increase solubility, availability, and uptake.

BENEFITS

- S, Fe, Mn, and Zn in each prill
- Dispersion and distribution across the entire acre
- Micronized particles that readily dissolve
- Handling – minimal dust and ease of use

CROP/RATES

Please see label for crop uses and rates.
