

VITACROP[®] Zn

Zinc is essential in plant development, it is also the most commonly deficient micronutrient worldwide. VitaCrop[®] Zn from Innvictis[®] offers the flexibility to add Zinc, Sulfur and Humic Acid to every dry fertilizer prill in your blend. By adding VitaCrop Zn to your dry fertilizer blend you're able to apply the right nutrients, at the right rate, in the right place and at the right time. By utilizing multiple forms of each element, VitaCrop Zn is also able to extend the window of availability for optimal plant uptake.

BENEFITS

- Provides essential micronutrients based on soil tests and soil type
- Delivers essential micronutrients on every prill creating a blanket across the acre
- Increases availability by combining multiple sources of each nutrient
- Excellent flexibility in storage, transport, blending and application
- VitaCrop Zn adheres to every prill without dust off, utilizing the combination of a proprietary adjuvant system as well as an electrostatic interaction

USE RATES

- Max application rate of 16 lbs / ton
- 100% water soluble pink powder
- Multiple crop use
- Please refer to soil test & conversion chart for recommended rate

GUARANTEED ANALYSIS

- 61% Zn
- 4% S
- 3% Humic Acid
