

VITACROP[®] Zn

VitaCrop[®] Zn from Innvictis is an innovative micronutrient formulated for adhesion to dry fertilizers for greater distribution, utilization and maximum agronomic ROI. By adding VitaCrop Zn to your dry fertilizer blend, you're able to apply the right nutrients at the right rate, in the right place and at the right time. VitaCrop Zn is also able to extend the window of availability for optimal plant uptake.

BENEFITS

- Provides essential micronutrients based on soil tests and soil type
- Delivers essential zinc on every prill, maximizing distribution and utilization
- Excellent flexibility in storage, transport, blending, and application
- Adheres to every prill without dust off, utilizing the combination of a proprietary adjuvant system as well as an electrostatic interaction

USE RATES

- Max application rate of 16 lbs / ton
- 100% water soluble pink powder
- Multiple crop use
- Please refer to soil test & conversion chart for recommended rate

GUARANTEED ANALYSIS

- 61% Zn
- 4% S
- 3% Humic Acid
