

Voda® Extreme is a unique polyacrylamide moisture management and polymer system that improves water penetration, lateral distribution throughout the soil profile, and retention.

### BENEFITS

- Proven micro-emulsion formulation
- Improves water penetration, lateral distribution, and retention
- Initial testing resulted in up to 30% reduction in water requirements with same yield

### NOTES

- Voda Extreme must be injected into a flowing water source
- For use in California

### USE RATES

**Irrigation systems:** Apply at a rate of 1 – 4 quarts per acre. Multiple applications may be required

Multiple crop use | Please refer to soil test

### FOR USE WITH

- Pesticides
- Liquid Fertilizer

Canopy Temperature
