

# CUE™

## SPREADER

CUE™ contains buffers that raise the pH of a spray solution to improve the stability and effectiveness of certain pesticides, especially in small grains, such as sulfonylureas. CUE also contains nonionic surfactants which aid in spreading and wetting to improve the absorption of these pesticides.

## BENEFITS

- Raises pH of acidic spray solution to create a more balanced carrier
- Blend of urea ammonium nitrate, propylene glycol, and alcohol ethoxylate
- Contains non-ionic surfactants to help with spreading of pesticide
