

ADJUVANT

# ENVELOP™

## COMPATIBILITY AGENT

A compatibility agent that allows pesticides to be mixed with liquid fertilizers that otherwise would separate and form layers.

## BENEFITS

- Effective compatibility agent that helps bring pesticide mixtures and fertilizer pesticide tank mixes together to improve the stability and uniformity of their application.
- Most effective when added before incompatibilities occur

## DIRECTIONS FOR USE

APPLICATION	ENVELOP PER 100 GALLONS
Liquid complete (N-P-K) fertilizers	3 to 4 pt
Liquid mixed (NP) fertilizers	2 to 3 pt
Liquid nitrogen fertilizers	1 to 2 pt
Wetter/buffer	1/2 to 2 pt
Pesticide incompatibility	1 to 2 pt

**Higher rates may be used to reverse incompatibilities.  
The rates listed in the chart are suggested but not limited**

## ACTIVE INGREDIENTS

Alcohol ethoxylate phosphate ester, Dipropylene glycol monomethyl ether **80 %**
