

Aviator is a multi-functional adjuvant formulated with INNTERO™ technology, which allows for greater spreading of droplets and wetting of the target surface, leading to optimal coverage and uptake. Aviator reduces pH, improves humectancy and contains an AMS free water conditioner that neutralizes hard water ions and improves pesticide performance.

FEATURES & BENEFITS

INNTERO technology

- A concentrated formula that improves wetting, spreading, and penetration capabilities

Decreased surface tension

- Greater spreading of droplets on the leaf surface

Lowers spray tank pH

- Improved performance and stability of most pesticides

Conditions hard water

- Protects pesticides from hard water ions that can reduce performance

Humectant properties

- Improves absorption by preventing droplets from drying too quickly on the leaf

NPE/APE free formula

- Excellent crop safety

PRINCIPLE FUNCTIONING AGENTS

- Ethoxylated fatty acid methyl ester
- Branched alcohol ethoxylate phosphate ester
- Ethoxylated sorbitan fatty acid ester

ADJUVANT FUNCTIONS

- Nonionic Surfactant
- Acidifier
- Penetrant
- Spreader
- Sticker
- Water Conditioning Agent
- Humectant

USE RATES

0.25% v/v or 1 qt/100 gal
