

COVERT[®] INNTERO[®]

Covert[®] is a multi-functional adjuvant formulated with INNTERO[™] technology, which allows for greater spreading of droplets and wetting of the target surface, leading to optimal coverage and uptake. Covert minimizes hard water antagonism, enhances deposition and coverage, while reducing potential drift of the spray mixture. These characteristics make Covert a great adjuvant for Dicamba and 2,4-D applications or when spraying around sensitive areas and crops.

FEATURES & BENEFITS

INNTERO technology

- A concentrated formula that improves wetting and spreading capabilities of spray droplets

Creates large, ultra coarse size droplets

- Significantly reduces drift potential

Decreased surface tension

- Greater spreading of droplets on the leaf surface

Conditions hard water

- Protects pesticides from hard water ions that can reduce performance

Humectant properties

- Improves absorption by preventing droplets from drying to quickly on the leaf

NPE/APE free formula

- Excellent crop safety

PRINCIPLE FUNCTIONING AGENTS

- Trisodium Citrate Dihydrate
- Alkyl polyglucoside
- Diethylene Glycol

ADJUVANT FUNCTIONS

- Nonionic Surfactant
- Deposition Aid
- Drift Reduction Agent
- Spreader
- Water Conditioner
- Humectant

USE RATES

GROUND OR AERIAL:

2 qts/100 gal or 0.5% v/v

OVER THE TOP DICAMBA APPLICATIONS:

Engenia Herbicide:

4 pts/100 gal

Tavium Plus and XtendiMax

VaporGrip Technologies:

5 pts/100 gal
