<sup>1</sup>For use on Glyphosate tolerant crops only. <sup>2</sup>For use on Glufosinate tolerant crops only. <sup>3</sup>For use on 2,4-D tolerant crops only. (All products tankmixed with Enlist One must be approved for use. Refer to enlisttankmix.com for most up-to-date tank mix approvals. <sup>4</sup>Use rate per acre may vary depending on tillage practices, soil type, or percentage of organic matter. Please refer to label. <sup>5</sup> For use on dicamba tolerant crops only. (All applications with Engenia must include a labeled DRA and VRA. All products tankmixed with Engenia must be approved for use. Please refer to engeniatankmix.com for most up-to-date tank mix approvals.

Two effective modes of action controlling broadleaf and grass weeds in soybeans. The proprietary XRT technology extends residual life by 7-10 days.

A fast-acting, dual mode of action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity, proven disease control, and increased plant health is delivered.

Premium nonionic surfactant with oil like performance with penetration and spreading capabilities. A versatile surfactant that has a fit in most pesticide applications.

Avenger Max is a proprietary formulation of bifenthrin and imidacloprid, offering dual modes of action for insect control. Containing high loads of active ingredient, Avenger Max can provide optimal performance at low use rates on a wide array of crops.

**\*Restricted Use Pesticides**
