

Rover is a modified seed oil/surfactant blend, formulated with INNTERO™ technology, which allows for greater spreading of droplets and wetting of the target surface, leading to optimal coverage and uptake. Rover's distinct combination of MSO and silicone surfactants make it a superior penetrant and excellent choice where labels calls for an MSO or MVO and do not exclude the use of silicone surfactants.

FEATURES & BENEFITS

INNTERO technology

- A concentrated formula that improves wetting, spreading, and penetration capabilities

Formulated with silicone surfactant

- Lower surface tension and greater spreading ability than standard oil blend adjuvants

Softens the waxy cuticle of a leaf

- Increased penetration

Optimal droplet sizing

- Improved deposition and coverage

PRINCIPLE FUNCTIONING AGENTS

- Methylated seed oil
- Branched alkyl phenol ethoxylate
- Ethoxylated seed oil

ADJUVANT FUNCTIONS

- Modified seed oil
- Penetrant
- Silicone surfactant

USE RATES

0.125 - 0.5 % v/v or 0.5 -2 qts/100 gal
