

RESTRICTED USE PESTICIDE

NIRVANA[®] COMPLETE

An in-can mixture of Nirvana[®] technology, bifenthrin, and pyraclostrobin. This "ready-to-use" liquid in-furrow insecticide and fungicide offers early season protection against costly yield-robbing pests and diseases. Nirvana Complete provides seed protection on a wide variety of crops including corn, cotton, soybeans, and many fruits and vegetables. Nirvana Complete may also be applied for foliar use in certain crops.

BENEFITS

- Controls seed and seedling pests such as armyworms, cutworms, grubs, seed corn maggot, and wireworms
- Maximum use rate controls corn rootworm
- Controls broad spectrum of yield robbing diseases
- Excellent tank mix partner with liquid fertilizers
- Stays in suspension longer than equivalent products allowing for more uniform application

KEY INSECTS

CONTROLLED

- Army cutworm
- Cutworm species
- Cabbage looper
- Seed corn maggot
- Root aphids
- Corn rootworm
- Wireworm
- Cucumber beetles
- Stalkborer
- Grape colaspis
