

Pavado™ TBZ is a broad-spectrum, systemic fungicide offering a premix of prothioconazole and tebuconazole. Pavado TBZ provides proven control over key diseases in wheat, barley, corn, and peanuts helping to protect yield potential. Pavado TBZ is an excellent rotational and tank mix partner ensuring a sustainable approach to any IPM program.

BENEFITS

- Controls both soilborne and foliar diseases with wide application flexibility
- Strong rotational or tank mix partner for an IPM approach
- Excellent control over Fusarium Headblight (Head Scab) in wheat and leaf spot and white mold in peanuts

PRE-MIX COMPONENTS

Pavado™ TBZ	Use Rate	Proline® 480 SC Equivalent	Vibe® Equivalent
	6.5 oz	2.9 oz	3.2 oz

ACTIVE INGREDIENTS

Prothioconazole 19%

Tebuconazole 19%

RECOMMENDED ADJUVANT

Adversary® 0.25-0.5% v/v

Valkarie® 0.25% v/v
