Trevo® TRZ DRV is a broad-spectrum, preventive fungicide with systemic and curative properties, and includes DRV technology driving more active ingredient into the plant more effectively.

A fast-acting, dual-mode-of-action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity proven disease control and increased plant health is delivered.

Controls annual broadleaf and grasses in field corn, seed corn, sweet corn, yellow popcorn, and grain sorghum before and after crop emergence. Villain XRT contains eXtended Residual Technology which improves deposition and keeps residual herbicides in the weed germination zone longer allowing for enhanced residual.

Non-ionic surfactant that contains multiple functions and properties including acidification, penetration, and water conditioning. Multiple properties in one jug allows for increased performance at lower use rates.
