

# REVIZE<sup>®</sup>

## PBI

Revize<sup>®</sup> PBI is a novel Soybean Seed Treatment that has a unique insecticide/fungicide combination that provides protection against key pests and diseases.

Revize PBI contains the active ingredient Ethaboxam, which fills in the gaps that Metalaxyl/Mefanoxam cannot on susceptible resistant Pythium.

### BENEFITS

- Has 3 novel fungicides that provide protection against most all soybean seedling diseases
- Protects Entire Plant: Multiple mode of actions create a complete zone of protection above and below ground
- Control on a Wider Spectrum: Protects against more Phytophthora and Pythium species, plus insects, than any other seed protection product
- User-Friendly Treatment: Smooth flowability and low use rate ensure a consistent, even application and easy treatment experience
- Contains Metalaxyl, Clothianidin, Ipconazole, and Ethaboxam

### ACTIVE INGREDIENTS

Clothianidin	<b>20.06%</b>
Ethaboxam	<b>2.97%</b>
Ipconazole	<b>0.99%</b>
Metalaxyl	<b>0.79%</b>

### KEY DISEASES CONTROLLED

- Seed rots
- Die back
- Phytophthora sojae
- Root rot
- Soil born Fusarium
- Pythium seed decay
- Rhizoctonia solani

### KEY INSECTS CONTROLLED

- Aphids
- Bean leaf beetle
- Leafhoppers
- Leaf weevil
- Thrips
- White grubs
- Wireworm

### RECOMMENDED USE RATES

#### SOYBEAN: 3.37 FL oz/cwt

- Revize PBI soybeans consists of ipconazole, metalaxyl, ethaboxam, clothianidin and red color. If using soybean inoculant, add sequentially with Revize PBI Soybeans.

**CONTAINER:** 14.48 gallon in a 15-gallon drum, treats 1,100 soybean units or 550 cwt
