

FUNGICIDE

FUNGICIDE GROUP: 4

Vaunt™ XL is a high load systemic fungicide for use on various crops to control diseases caused by members of the oomycete class of fungi. Vaunt XL offers a conveniently lower use rate and can help improve stand, root health, and crop vigor.

BENEFITS

- Highly loaded for optimal performance at low use rates
- Broad flexibility across many crops for simple disease control
- Go to fungicide for control of phytophthora, pythium, and other diseases in the oomycete class of fungi

KEY DISEASES

CONTROLLED

- Citrus foot rot
- Crown rot
- Damping-off
- Downy mildew
- Pink rot
- Pod Rot
